Incense Holder Made from Awaji

Tiles "All things are born from the earth and return to the earth." Just as each of us exists in this way,we reflect the universal nature and our present mind in the soil. Touching and cultivating the earth is like cultivating the heart, nurturing the richness of the spirit. This incense holder serves as a foundation for harmony with nature. A heart that is gently cultivated brings forth peace and compassion, and the fragrance circulates through nature.
